GOVINDA RAM PINGALI

ENGINEER · MUSICIAN · FARM MANAGER

CONTACT

+1 (678) 644-4488

govinda@pgr.earth

Oakland, CA, USA /
Kavanapura, KA, India

SKILLS

Ecology & Production

- Permaculture Design
- Wastewater Systems
- Natural Building
- Event Production
- Logistics & Organization

Engineering

- Software Development
- Audio Engineering
- Electronics Testing

Music & Media

- Music Production
- Sound Design
- Spatial Audio
- Modular Synthesis
- Photography
- Video Editing

Programming

C/C++, Objective-C, Swift, HTML/CSS, JavaScript, Python

Applications & Equipment

Ableton Live, Max/MSP, Logic Pro, Adobe (Photoshop, Illustrator, Audition, Premiere Pro), Autodesk Fusion 360, Eurorack

WORK EXPERIENCE

TECHNOLOGY & INDUSTRY

Apple Inc. | Siri Audio Software Engineer

Cupertino, CA · 2022–2025

- Resolved "Hey Siri" activation issues across hardware and software releases, focused on iOS accessories - CarPlay and AirPods.
- Validated and managed releases of a palettized wake-word model for the Always-On Processor across iPhone hardware builds, improving "Siri"-only detection accuracy within tight compute and memory limits.
- Contributed to wake-word model switching on iOS, AirPods, HomePod, and macOS. Documented alternate wake-keyword API and messaging flows across audio, Bluetooth, and Siri software and hardware; created and coordinated cross-functional test suites with 20 test engineers.

Orgona | Developer & Co-Founder

Remote · 2020–2022

Designed and developed an immersive VoIP app that places conversations in shared acoustic spaces with distinct soundscapes shaped by voice reverberation, spatialization, and ambient sounds.

- Built the iOS interface and app logic in Objective-C/UIKit, and a CoreAudio/C++ audio engine. Developed a Flask/Python VoIP backend integrated with Twilio; launched a TestFlight beta for about 100 users.

Apple Inc. | Core Audio Software Engineer

Cupertino, CA · 2016–2019

- Worked on the Core Audio software stack, helping ship the original HomePod and H1 chip-based AirPods.
- Built DSP analysis tools used by Audio QA teams for automated testing.

SoundFocus | iOS & Audio Software Engineer

San Francisco, CA · 2014–2016

Developed software and validation tools for *AMP*, a Made for iPhone case with an embedded system for personalized audio.

- Owned and developed the Objective-C iOS app for hardware setup; built macOS/iOS interfaces and testing tools for the C++ audio engine.
- Implemented USB audio/I2S/UART drivers, STFT-equalizer, single-band compressor, and gain smoothing (in C) on STM32F4 (ARM Cortex-M4).
- Profiled audio algorithms on iOS and STM32F4; debugged PCB power circuitry and characterized amplifiers and micro-speakers.
- Supported two Engineering Validation Test builds in China, designing PCB electrical tests, Audio Precision electro-acoustic tests and tolerances, and the iOS factory functional-testing app.

EDUCATION

Master of Science in Music Technology

Georgia Institute of Technology
Atlanta, GA, USA
Aug 2012–May 2014

Bachelor of Engineering in Instrumentation Technology

R.V. College of Engineering
Bangalore, KA, India
Sep 2008–May 2012

COURSES

Sound Journey Facilitation Training

SVARAM
Auroville, India
January 2026

Singing Bowl Mastery: Techniques and Healing

iChakras
Los Altos, CA
Spring 2024

Permaculture Design Course

Santa Cruz Permaculture
Año Nuevo, CA
Apr–Sep 2023

WORK EXPERIENCE · CONTINUED

PERMACULTURE & FARM PRACTICE

Palette o' Green 'n Red (www.pgr.earth) | **Farm Manager**

Helped develop and manage a 3-acre permaculture farm.

Part-time / Remote · 2022–Present

- Run the farm website and advise remotely on planting, soils, construction, and solar upgrades; visit during mango season.

Kavanapura, Karnataka · Full-time / On-site · 2019–2022

- Built and maintained vermicomposting system, rainwater swales, and wastewater treatment systems.
- Designed plumbing and electrical infrastructure; helped install a 5 kW solar system with 13 kWh storage.
- Helped design and construct lodging, event spaces, and a café - using stabilized mud blocks and natural pole trusses; coordinated construction.
- Managed a two-acre organic mango orchard, including tree care, disease management, harvesting, and distribution.

The Becoming Festival (www.thebecomingfestival.com) | **Host / Producer**

PGR Farm · December 2025

Produced and hosted a prototype two-day community jam for 30 attendees, coordinating programming, venue operations, production, hospitality, and live performances.

MUSIC & CREATIVE PRACTICE

Elektric Body | **Music Producer / Composer / Live Performer**

San Francisco, CA · May–August 2026

Composed, recorded, produced, and performed a 30-minute musical work for an aerial arts and dance performance at Fort Mason SF, combining live instrumentation and electronic composition. Mixed in 3rd-order Ambisonics and rendered live over an octophonic sound system.

Circus & Strings | **Drummer**

San Francisco, CA · 2024–2026 (annual; latest August 2026)

Played covers for about 13 aerialists in a four-piece band on a hybrid acoustic/electronic drum kit, combining stick and finger drumming.

Travelling Waves | **Creator / Developer**

Remote · 2016–Present

Built an iPad "sound-healing-synthesizer" app (UIKit, C++ audio). Released as a TestFlight beta. 16 voices, each with two oscillators in stereo for beat frequencies, filters, and LFO-driven amplitude modulators, all controlled by a master timing clock and pitch frequency ratio controls.
